

New Transactions Borrowing From Treasury Credit Reform Repayment

Borrowing From Treasury transactions have been separated from the other Non-Expenditure transactions due their uniqueness and specific audience.

The Borrowing From Treasury application automates all of the tasks required of agencies and FMS, including providing online retrieval of the forms that are generated by the system. The application eliminates the manual processing and approval of SF-1151 documents and provides users with the ability to transmit Borrowing and Repayment transactions across the Internet from any location worldwide. Users are provided the ability to track and view their transactions while they are being processed, i.e., from the time of initial entry until the transaction is posted to Treasury's Central Accounting System (STAR). When the transaction is posted to STAR, the Fund Balance with Treasury will be updated to reflect the transaction.

Prior to entering a Credit Reform Repayment transaction, you must complete the FMS ESSAS form that is available for download from the GOALS II Website (<http://fms.treas.gov/goals/aboutgoalsii.html>). The roles that can be selected are described below:

Agency Preparer – This role allows the user to enter a new Non-Expenditure Transfer SF-1151 request specific to the requested application(s), edit a request that has not been submitted to their certifying officer, monitor the status of requests that they have completed and to respond to rejections of submitted requests.

Agency All – This user role has been defined for those agencies that have limited resources available to separate the duties of both entering and certifying a Non-Expenditure Transfer SF-1151 request. Approval of the request for this role for the GWA BPD NET application is contingent upon the requestor having a current signature card on file at the Bureau of the Public Debt for credit reform accounts.

Note: A user can only be assigned to one role per application.
